The passing of a legend

Tim Wilson

In November, freedom lost one of its foremost advocates. Until his passing, Milton Friedman remained committed to the causes he championed. He is best known for his work on monetarism and its adoption by Reagan and Thatcher, but his success stemmed from his commitment to freedom.

Critics have tried to rewrite his history. During the ceremony for his Nobel prize in 1976, protesters attacked him for working with the Pinochet government of Chile. What they ignored was his purpose and achievements. Pinochet brought Friedman to Chile to slay the dragon of hyper-inflation. It was bankrupting the country due to the communist inflationary policies of Salvador Allende. Friedman successfully argued that reducing state intervention in the economy would slow inflation and promote growth. For Friedman, his aim was as much to slow inflation as it was to promote economic freedom.

He believed that by promoting economic freedom, social and political freedom would follow. History shows that he was right. In an interview for the 2002 television series Commanding Heights: The Battle for the World Economy, he pointed to the link between the return of democracy in Chile to the economic liberty he was responsible for. He can also take much credit for Chile’s wealth that embarrasses many nations and its adoption by Reagan and Ronald Reagan amongst others, attesting to the impact it had had upon their image of a liberal society.

His 1962 work Capitalism and Freedom has sold half a million copies and has been translated into 18 languages. In this accessible work, he lays out convincingly the case against mandatory professional licensing, and for school vouchers. It is necessary to reflect just how radical his school voucher scheme was, given that, in 2006, vouchers are discussed so casually.

The Friedman Foundation was established to champion this case. Its charter remains the promotion of school choice for parents. Friedman believed that vouchers would marry the benefits of choice with the need for universal access to education.

Despite his work, teacher unions resisted any push for increased demands in an education market. They used the weapons of class envy to promote fears that parents with privilege would top-up the value of their children’s education.

Friedman remained undeterred. He said that when parents used money to buy alcohol and cigarettes, no-one complained. When it was spent to top up the financial contribution of their children’s education, parents were charged with anti-egalitarianism.

One of the great mistakes is to judge policies and programs by their intentions rather than their results. We all know a famous road that is paved with good intentions. The people who go around talking about their soft heart... unfortunately, it very often extends to those who do not now enjoy the fruits of the programs they’ve been ladled as being for the poor, for the needy, almost always have effects exactly the opposite of those which their well-intentioned sponsors intend them to have.

His documentary, Free to Choose, which was converted into a book co-written with his wife Rose Friedman, convinced a generation of Americans that free markets were under attack from the false promise of socialism and the welfare state. When the series was rebroadcast in 1990, it was introduced by Arnold Schwarzenegger and Ronald Reagan, amongst others.

Tim Wilson is a consultant on trade liberalisation and globalisation. His interview with Friedman appeared in the September 2005 IPA Review.
